MCS KM 2250 Black and White Digital Press

Black and White cut sheet laser production can be a challenge in the mailing industry. Heavy stocks, odd size paper, poor perforations, paper dust and coated stocks are just some of the challenges all mailers face. While there is no perfect laser press, there is no better value than the MCS KM 2250.

The MCS KM 2250 has three unique features that make it the best value in black and white printing:

1. Both air assist and vacuum feeding on the high capacity input tray
 - The mailing industry uses the most demanding stocks, and this combination offers the greatest flexibility for feeding demanding stocks.
2. Odd size paper feeding
 - From 12"x19" down to 3½"x5" and any size in between
3. Images on coated stocks
 - Prints on coated paper including 100 lb cover coated two sides duplex

Description	Specifications
8½"x11" simplex pages per minute	250 IPM/125 PPM
Minimum page size	3½"x5½"
Print quality	1200 DPI

The MCS Difference

The needs in production laser printing are unique in the mailing industry. MCS has successfully sold hundreds of presses nationwide to small and large mail shops. Our direct service organization maintains printers that produce over 400 million pages per month. MCS has support which is specific to the mailing industry and includes paper and workflow technical support.

Nationwide: Local Service, parts service and industry specific service

MCS offers nationwide service for hardware, and we offer a national technical support service for industry-specific support. No other vendor understands the pressures and needs of direct mailers like MCS.

MCS offers professional mailing print RIP controllers for spooled file work flows including Postscript, PDF, and PLC files.
