MCS KM 6100 Color Digital Press

Production color digital printing is affordable with the MCS KM 6100 color digital press. For less than \$2,500 per month, the MCS KM 6100 produces mailing products on heavy coated stocks with brilliant quality. Built for mail, the MCS KM 6100 has three unique features that make it ideal for professional mail production.

Features

- Air assist & vacuum feeding high capacity input tray allows for flexibility feeding demanding stocks
- 80% increase in duty cycle over previous model
- Printing up to 400 gsm simplex or duplex
- Up to 13"x19" paper size - with full bleed opportunities
- In-line server calibration, machine image stability and front to back registration built-in
- Supports envelope printing with swappable fusing section
- Supports banner printing with additional paper supply options
- In-line finishing options (this a take it or leave it one for me, we almost never sell finishing options)

The MCS Difference

Color digital presses offer an unlimited number of configuration possibilities, but very few work in the direct mail environment. MCS configures all of our digital presses with proven peripheral equipment and industry leading RIPs, to ensure our customers' success. In many cases, customers have asked MCS to replace an existing color

Mailing Product	Number up	Cost per Mail Piece
4"x6" Full Bleed	8 up	< 3 cents
6"x9" Full Bleed	4 up	< 6 cents
6"x11" Full Bleed	3 up	< 8 cents
8-½"x11" Full Bleed	2 up	< 10 cents

digital press with a MCS press because the original equipment was configured incorrectly.

Turnkey Solutions

MCS offers turnkey solutions including color digital presses, professional RIPs, variable data printing software, on-site training and mailing

Description	Weight	Finished Sheets per Minute
8-½"x11" Simplex	60 lb offset	100 sheets/minute
11"x17" Simplex	60 lb offset	53 sheets/minute
12"x18" Duplex	110 lb Cover C2S	25 sheets/minute
13"x19" Duplex	110 lb Cover C2S	25 sheets/minute

industry specific secondary support.

Nationwide: Local Service, parts service and industry specific service

MCS offers nationwide service for hardware, and we offer a national technical support service for industry specific support. No other vendor understands the pressures and needs of direct mailers like MCS.
