

This file was created by MCS Array Imaging Software with comments added using Adobe Acrobat 8.0. The software was designed to allow customers to perform sign-offs electronically, saving time, and improving quality control. The yellow post-it-notes would be comments from the customer. Scan through all 8 pages. Click on the Post-it-notes!

Print Quality for job

This page is optional, and can be used for quality control in production. This page can be printed out and used internally by stapling to a job jacket and used by the operator to check the job.

This process saves time and improves the work flow of job setup and production.
